

WHAT IS GREEN POWER?

GREEN POWER is energy produced from a renewable source, like the wind, the sun, or water. These sources of energy emit no air pollutants or net increase in green-house gases.

Currently, all of PWP's GREEN POWER comes from one of the cleanest energy sources available: the High Winds wind farm in Northern California.

WHY BUY GREEN POWER?

Join over 10,000 environmentally-responsible businesses nationwide that support renewable energy. Your support for GREEN POWER helps to reduce your environmental impact. It also can protect against price fluctuations for fossil fuels. Committing to GREEN POWER shows your customers and employees that your business is a leader in our community's efforts to promote a healthy environment.

HOW MUCH DOES IT COST?

You have two options for purchasing GREEN POWER: 1,000 kWh blocks at \$18 per block, or ALL GREEN at 1.8¢ per kWh of actual usage. For instance, you could choose to purchase four 1,000 kWh blocks for an additional \$72 per month or if you chose the ALL GREEN option and your actual usage was 1,500 kWh you would pay an additional \$27.

Thank you for choosing to enroll in Pasadena Water & Power's Commercial Green Power Option.

Your commitment to the Green Power Program distinguishes your business as an environmentally-responsible leader in the Pasadena Community.

IT'S SIMPLE TO ENROLL

Signing up for the Green Power Option is as easy as 1, 2, 3:
